Phase Technology Online Process Analyzer Training Program

The only factory-certified training program that is taught by Phase Technology scientists, technicians, and senior staff

The Phase Technology Online Process Analyzer Training Program gives you a comprehensive understanding of cold flow property testing, system setup and operation, hands-on troubleshooting and problem resolution, component module replacement, and long-term maintenance procedures.

- Discover the full capabilities of your online analyzer
- Get hands-on experience replacing key components
- Learn how to respond to system alarms and diagnose problems
- Become proficient in proactive daily inspections, troubleshooting and daily maintenance routines
- Identify the modules that make up the online system and their function
- Gain a comprehensive understanding of accepted, worldwide ASTM standards
- Understand how to interpret and analyze results

- Network with your peers and meet Phase Technology engineers

Who Should Attend?

- Unit, Instrument or Field Service Technicians
- Process Technicians and Engineers
- Corporate Trainers and Quality Assurance Managers
- Anyone responsible for test results and data integrity

Practical Course Content

Your Phase Technology Professional Operator Training is structured to give you insight into the three components of test bias:

1. **Eliminating Technical Bias:**
The payoff of precision

Learn the technology behind Phase Technology's ASTM methods for automatic cold flow testing with no bias towards manual methods.

2. **Eliminating Mechanical Bias:**
Properly maintained and up-to-date test equipment

Learn ways to best keep your Phase Technology analyzer at peak performance for years of continued reliability.

3. **Eliminating Human Bias:** Freedom from operator-introduced error

Hands-on training will teach you how to control and monitor the online testing process to ensure release of in-spec product

Gain Valuable Knowledge; Develop Expert Skills

The 2-day Phase Technology Online Process Analyzer Training Program is offered to participants from companies that own Phase Technology analyzers.

Phase Technology provides meals and refreshments during the day sessions. Cost per participant is \$2500.
